

Connect

PepperDash Connect™ allows you to integrate your audiovisual control system with popular third-party scheduling and signage systems. Enable walk-up room reservations, synchronize scheduling applications, and display room and meeting information on displays.

Supports Multiple Scheduling Systems

The scheduling solutions below are currently supported by PepperDash Connect. If you need to integrate with a solution not shown on the right, give us a call, we are always open to the opportunity to expand our feature set.

- EMS
- Series 25
- Meeting Planner
- AdAstra
- UngerBoeck
- Crestron Fusion
- Briefing Source

Integrate

Display room schedule and meeting information on room signage displays.

Synchronize

Automatically synchronize your scheduling solutions.

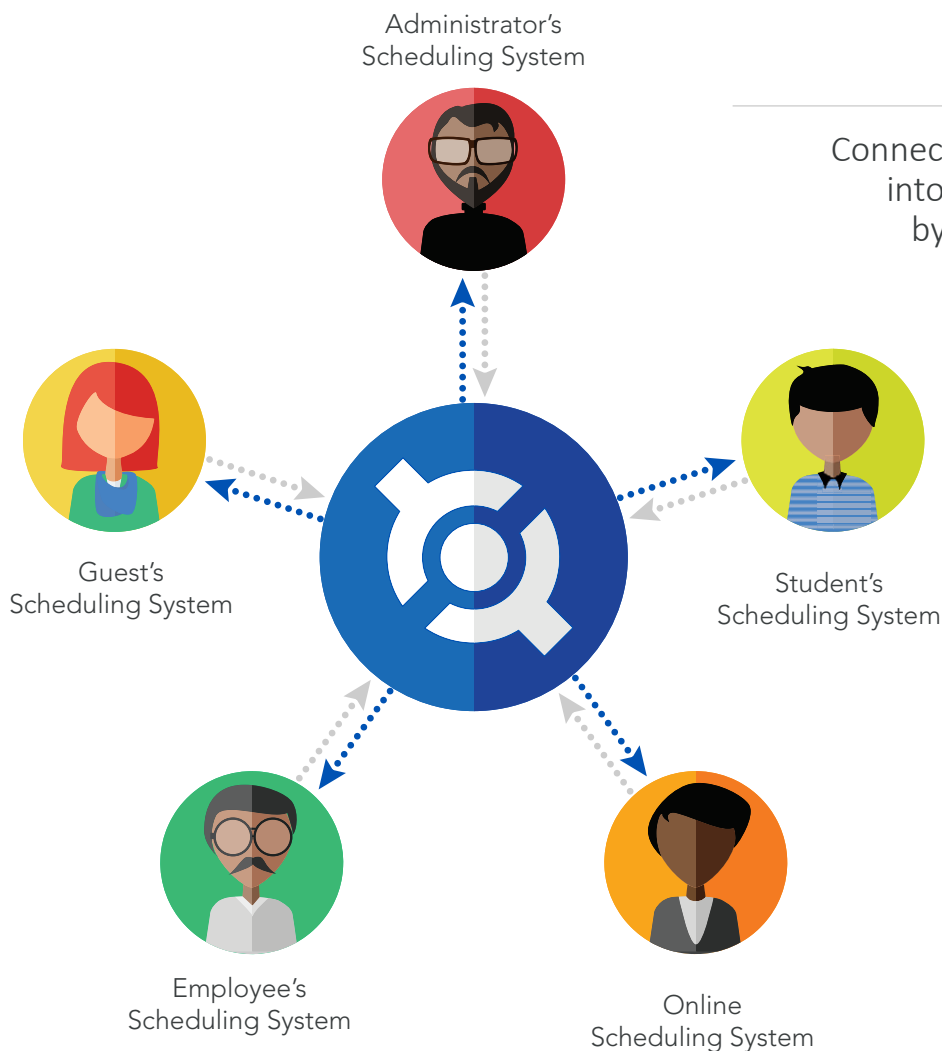

Reserve

Enable walkup reservations on in-room touch panels.

Do more with your scheduling solutions

PepperDash Connect is a multi-scheduling interpreter that relays scheduling information from one software solution to the control system whenever changes are made. This behavior helps keep your systems running, and alleviates potential usability concerns.

Connect to Scheduler

Connect translates scheduling information into a protocol that can be understood by each of your scheduling solutions.

Scheduler to Connect

Each of your scheduling solutions provides PepperDash Connect with its scheduling and meeting information.

Integrated Schedules

Your scheduling solutions are now fully integrated, each solution updated with the scheduling information from the other solutions.
