# Mobile Booking

Empower your users to find available rooms, view availabilities, and book meeting spaces directly from their phone, tablet, or computer. Mobile Booking integrates with and extends your existing scheduling system, increasing accessibility without switching platforms.

Find and reserve meeting spaces on-the-go

Fast

Find and book collaboration spaces in seconds from phone, tablet, or laptop – no app required.

Secure

Mobile Booking utilizes single sign-on SAML authentication, making authentication easy and secure.

Modern

Provide the seamless modern experience everyone expects.

Use Cases

Highly mobile workforces where users move around frequently.

Higher education environments where people need to book rooms at any hour without tech support.

Collaboration spaces where users may need a room without advanced notice.

Any environment with shared collaboration and meeting spaces.
